INVENTOR CREATES OP ART MACHINE

PETER McCAFFREY OF ROCKVILLE CENTRE, N.Y. DOES THE IMPOSSIBLE!

He's invented a machine that creates masterpieces, and no two are alike! Here is how Peter's invention works:

Open window attracts cat [a] walking on board [b] which causes string [c] to upset pailful of paint [d] letting paint fall in a skinny can [e]. Little hole at bottom of can [f] causes paint to drop into billboard [g] for an op art picture.

The op art painting [h] will be put into an art museum and win \$90,000 for the most creative work of art.

YOU DON'T HAVE TO BE AN ARTIST

You can also participate in the Comics Club fun by sending in jokes to be printed in the JOKES ON YOU page — a feature that's a real favorite. If you can write a joke, put it down on paper and send it to us, so everyone can enjoy it.

Listen to what Judy Marcantili of De Quincy, Louisiana, overheard:

Ben: That's a good joke! Why don't you send it to Gold Key Comics?

Jim: I can't.

Ben: Why not?

Jim: That's where it came from!

Thanks, Judy!

Submit jokes to JOKE ON YOU, c/o Gold Key Comics at the address given below.

MONSTERS WON'T GO AWAY

They just wouldn't give up when they heard we were going to print drawings of other animals plus inventions and airplanes on the pages where they've been running loose. So we're letting a few more in the side door before giving them a well-deserved rest from their snorts. Here's a cute little monster sent by five-year-old Scott Wiley of Waterford, Ohio.

THE SKIMMING MONSTER

It skims the water and picks up fish with its big tooth.

ARTISTS CONTINUE THEIR WORK

Machines may come and go, but artists go on forever — and we're glad of it. Inventions, animals, airplanes — whatever you draw, we want to see it.

HOW TO DRAW ART

Draw in black ink on white unlined paper for clear reproduction and send to "Be An Artist" c/o Gold Key Comics at the address given below.

DINOSAURIA

BRACHIOSAURUS

Some hundred million years ago, this huge fifty-ton dinosaur lived in and by the swamps of the prehistoric world. Measuring over eighty feet from nose to tail, with its great neck, it towered over forty feet high! Its tremendous legs were shorter in back, letting the tail and rear sink down as it progressed. Because of water's natural buoyancy, the giant dinosaur was able to move about easily in swamps, its tail helping to propel it along. The Latin name for this bulky dinosaur means "arm lizard."

The brachiosaurus' elevated nostrils permitted it to breathe with its head just above the surface of the water.

Hatched from an egg weighing about a mere two pounds, by maturity the brachiosaurus' weight increased 50,000 times and its length 60-fold.
